

# How Do You Entertain and Modernize Diverse Customers Across a Vast Nation?

Since 1979, customers in Argentina have looked to Carsa S.A. for the best in home electronics and appliances. The company's declared mission is to provide outstanding customer service, first in its physical stores across the nation, and now also through its leading-edge online marketplace. With a focus on logistical efficiency and superb technical support, it aims to keep its diverse customer base comfortable and satisfied.

Recognizing that new technologies had improved logistics and user interface through in-memory processing, Carsa recently updated its systems. It wanted to run the SAP® Transportation Management application and analytics based on the SAP Fiori® user experience on the SAP HANA® business data platform. Relying on SAP Enterprise Support and product value maps delivered by the SAP Digital Business Services organization, Carsa identified the tools and expertise required, eliminated the need for third-party consulting, and protected business continuity throughout the deployment.

“With outlets and customers across Argentina, we depend on rigorous logistics and a positive user experience at all touch points. We aim to **improve our logistic scenario** by implementing **SAP Transportation Management.**”

Sergio José Del Castillo, SAP Basis Architect, Carsa S.A.

With systems fine-tuned through SAP® Enterprise Support services and the SAP Transportation Management application, Carsa can now access KPIs in a browser to improve shipment and support of products for entertainment, including music, films, and games; electronics, including LEDs, tablets, notebooks, cameras, and cell phones; and home appliances, including refrigerators, washing machines, air conditioners, and microwave ovens.

**Revenue**  
US\$625 million

**SAP<sup>®</sup> Solutions**  
SAP HANA<sup>®</sup> business data  
platform, SAP<sup>®</sup> Transportation  
Management application,  
SAP Fiori<sup>®</sup> user experience,  
and SAP Enterprise Support  
services

Entertainment and home appliance giant Carsa upgraded its transportation management systems to run in a high-availability environment running on SAP HANA. It also built an analytics structure based on SAP Fiori to deliver data on KPIs through mobile devices.

## Before: Challenges and Opportunities

- Improve tracking of transportation processes and costs to tighten logistics and raise ROI
- Sharpen competitive edge with shorter delivery times
- Increase satisfaction of customers in physical stores

## Why SAP

- Guidance from robust value maps for scoping major projects
- Improvement of project implementation of mission-critical software by providing guidance, best practices, and documentation
- Continuous quality checks in SAP Enterprise Support to safeguard implementation

## After: Value-Driven Results

- Saved time by quickly identifying the tools and expertise needed to install SAP Fiori
- Better availability by designing and implementing a high-availability environment for transportation management on SAP HANA
- Improved visibility and performance by empowering users to view KPIs through a browser on mobile devices

**“SAP Fiori and SAP Transportation Management now run smoothly on SAP HANA thanks to the best practices provided by SAP Enterprise Support services. And SAP Enterprise Support value maps helped us successfully deploy analytics for viewing KPIs through SAP Fiori.”**

Sergio José Del Castillo, SAP Basis Architect, Carsa S.A.

## Cost-effective

Technical implementation with no third-party assistance

## High-availability

Environment for transportation management and analytics on SAP HANA

## Transparent

KPIs available on mobile devices through SAP Fiori
